SUMMARY

Full Stack Web Developer versed in MERN stack. A determined problem solver with a passion for developing apps with a smooth interface. Implemented agile development in several recent projects and worked with several teams to develop web applications including a single-page MERN app. Excited to use skills as part of a quality-driven, creative team developing user-friendly solutions.

TECHNICAL SKILLS

Languages: HTML 5, CSS, JavaScript, jQuery, SQL, GraphQL

Applications: MongoDB, Express, React, Node.js, Apollo, Insomnia, MySQL, GitHub, Heroku, Lighthouse

Tools: Sequelize, Mongoose, Webpack, Inquirer, Jest, Bootstrap, Materialize, REST

PROJECTS

Lovely Librarian | <https://github.com/bcassellius/lovely-librarian> | <https://lovely-librarian.herokuapp.com/>

- **Description:** A PWA that allows a user to do internal library tasks. Users login to search for books, view a calendar of events, and search for staff members.
- **Technology:** React, google books api, fullcalendar plugins, service workers, dotenv, and bcrypt, styled with Bootstrap and CSS, Github, and heroku
- **Contributions:** Project management, deployment, and implementing the calendar feature, seed files, and css

Book Tracker | <https://github.com/bcassellius/book-tracker> | <https://dry-wildwood-65158.herokuapp.com/>

- **Description:** A live app that allows a user to login and keep track of books they've read and would like to read. Users login to view their books or add books to their specified list.
- **Technology:** Express, handlebars, MySQL2, dotenv, and bcrypt, styled with Materialize, Github, and heroku
- **Contributions:** Schemas and routes, deployment, and implementing seed files, css, and ui features

Weather App | github.com/bcassellius/weather-dashboard | <https://bcassellius.github.io/weather-dashboard>

- **Description:** A live app that allows a user to lookup weather forecasts and details
- **Technology:** JavaScript, JQuery, and server side api, styled with Bootstrap, and Github
